Graduate To A Better Life In Less Than One Year!

Yanet Lopez, MAA

"Ever since my high school health academy, I have been interested in the medical field. I saw myself becoming a nurse or helping at the front desk. Since the close proximity of needles makes

me nervous, I opted for what is now the Health Information & Patient Services program. In the beginning, I did great but then I began to lose my focus. However, my teachers never gave up on me and I got back on the road to success!"

Marco Vargas, MA

"I was trying to balance school full-time and work full-time, which was impossible. Also, despite my efforts, bills were piling up. Something needed to change – and fast. The Medical Assisting program

was the answer for me. Over the past nine months, I enjoyed getting to know my classmates as we learned to work together as a team. I know I made the right choice because my quality of life has improved and I'm enjoying my new career in the field of optometry!"

Audri Espinoza, COA

"In the past, I've held down different jobs – but I was on no real career path. Wanting more, I chose the Computer Office Administration program. This allowed me to gain

more knowledge of computers and learn to act in a more professional manner. You might say I received computer and etiquette training! I am happy to have been hired as the college's Administrative Assistant. If – and when – you call, I'll probably be the one answering the phone!"
